

Ovarian Cancer Treatment Outside the Box: Parp Inhibitors and Other New Approaches

If you or a loved one has been diagnosed with ovarian cancer, we welcome you to attend a presentation with Compass Oncology gynecologic oncologist, Lisa McCluskey, MD, and certified genetic counselor, Becky Clark, MS, CGC.

Ovarian cancer is a complicated disease that currently has no widely-accepted screening test, and its symptoms tend to mimic other common ailments. We do know that a genetic link between ovarian, breast and colorectal cancers exists. For these reasons, knowing more about the signs of ovarian cancer and your family history is essential.

Our presenters will share the latest treatment options for ovarian cancer and genetic risks that are important for you and your family to understand. Join us and get your questions answered by expert clinicians who are ready to help.

This event is in partnership with:

Ovarian Cancer Alliance
 of Oregon & SW Washington

Lisa McCluskey, MD

Dr. McCluskey is board certified in Gynecologic Oncology, Obstetrics and Gynecology. Her practice focuses exclusively in the highly specialized field of gynecologic oncology. She is an accomplished surgeon and an expert in advanced, minimally invasive procedures utilizing the daVinci® robotic system. Dr. McCluskey earned her Doctor of Medicine degree at OHSU in Portland, OR

completed her Obstetrics & Gynecology residency at the University of Missouri-Columbia in Columbia, MO and Gynecologic Oncology fellowship the University of Southern California in Los Angeles, CA.

Becky Clark, MS, CGC

Becky completed her Master of Science degree in Genetic Counseling at the University of Michigan. She believes the most important aspect of genetic counseling is to provide patients with support and education so they can make informed decisions in their healthcare.
